SECURE DATA TRANSMISSION
FOR YOUR COMPANY

INTERNET BIZNES

Internet Biznes is a top-class symmetrical, dedicated Internet access link for your company. The same speed of data exchange in both directions ensures connection stability and comfort of use.

The service can be implemented using several types of access technologies, including optical fibre links and point-to-point as well as point-to-multipoint radio links. The offer includes a wide range of bandwidths – from 1 Mbps to 100 Gbps.

WHO IS THE SERVICE DEDICATED TO?

In the era of global digitalization, every company, no matter the industry, needs specific solutions concerning internet access.

It mostly concerns companies that, for their proper functioning, rely on:

- Systematic transmission of data.
- Guarantee of a constant access, to the band.
- Efficient communication with cloud resources.
- Sending and receiving large amounts of data.

BENEFITS

Reliability

Stable connection, regardless of the number of users and devices using the internet access.

SLA agreement

Guaranteed maintenance of service parameters, including availability and failure removal time.

Customer Service

Technical support 24/7/365.

Additional services

Ability to select many additional services.

Availability

Ensuring efficient communication in both directions at the same speed throughout the country.

Performance monitoring

Continuous monitoring of service parameter performance – access to analytical tools.

Scalability

Choice of access technology and wide range of bandwidth enable flexible adaptation to customer needs.

SECURE INTERNET

The point of contact with the Internet plays a fundamental role in ensuring cybersecurity and identifying threats. It is an intermediary in communication traffic, connecting with the outside world, which should be closely supervised and treated as a border point.

Direct supervision of outgoing and incoming traffic is one of the pillars of effective monitoring of the ICT infrastructure. **Lack of proper monitoring and analysis of events at the interface with the Internet is one of the basic causes of incidents of ICT security threats.**

SERVICE DESCRIPTION

The extension of the Internet Biznes product with the Secure Internet service **guarantees comprehensive network protection**. The service is based on mechanisms for controlling network traffic and protecting users from threats from the Internet.

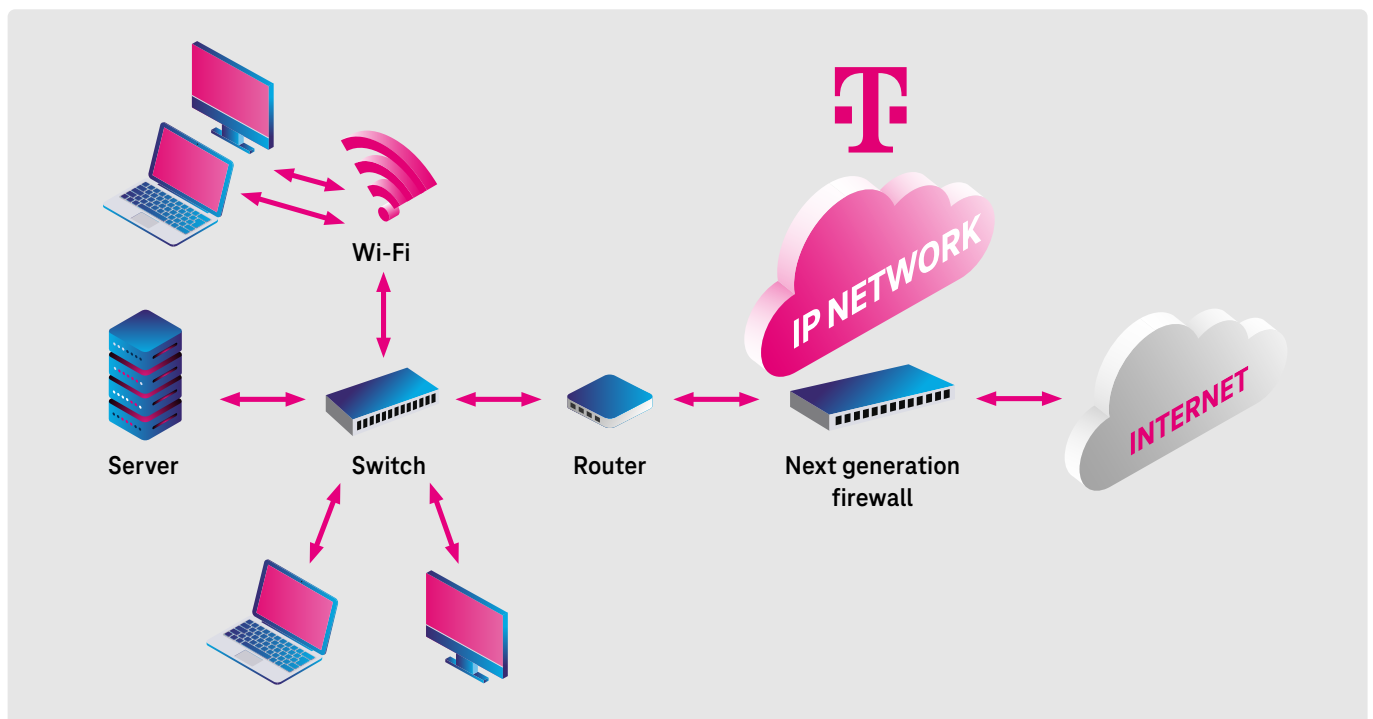

The product launches a new generation firewall, provided by the technological Partner, Fortinet. The service includes the configuration and implementation of security policies to protect the network. T-Mobile provides maintenance, administration, **24/7 technical support**, and management, including updating the threat database and creating periodic reports. **The service is available via a T-Mobile internet connection.**

SAFE INTERNET PACKAGE

CYBERSECURITY, WWW AND APP CONTROL

-  Firewall
-  Antivirus

- **The highest level of protection of the Internet connection**, based on security policies.
- **Guaranteed** data security and confidentiality of information.
- **Full outsourcing** – full responsibility for maintenance and configuration on the part of T-Mobile.
- Billing model in the form of a **subscription fee**.
- No dependence on the delivery of devices – **the service is launched within 3 business days at most**.
- Possibility of including additional functions, such as **intrusion prevention, website filtering, antivirus, antispam and Anti-malware**.
- **Backup** – possibility of protecting the backup Internet connection provided by T-Mobile (applies to the symmetric service).

FIREWALL AS A SERVICE VS IN-HOUSE

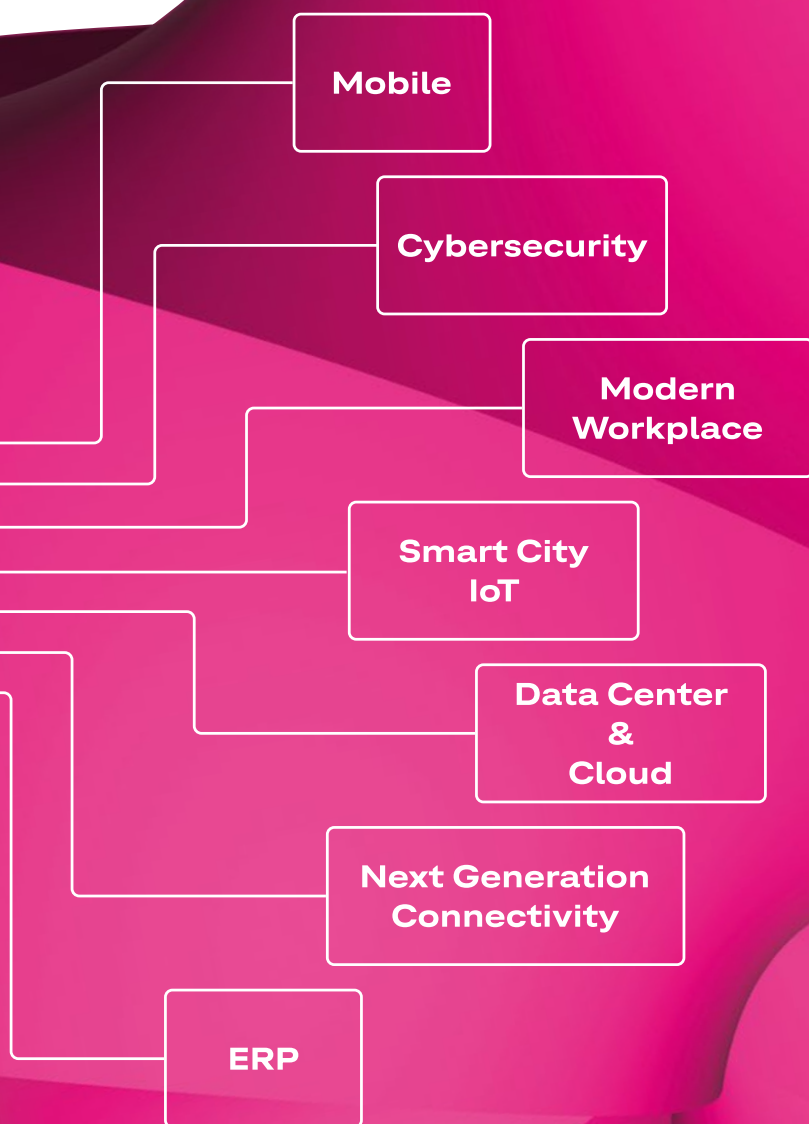

Take care of your company's cybersecurity without having to employ IT specialists and incur additional costs of building your own infrastructure based on a new generation firewall. The Secure Internet service is designed especially with small and medium-sized businesses in mind. Certified T-Mobile specialists ensure quick installation and immediate protection of the point of contact with the Internet to T-Mobile.

Secure Internet is a comprehensive service that allows you to focus on your company's business activities, while T-Mobile will take care of the security of your point of contact with the Internet.

	IN-HOUSE FIREWALL	FIREWALL AS A SERVICE
Discounts	Minimal discounts when buying new FW	Possibility of negotiating additional discounts
SLA	None	SLA partner guarantee
Devices	Using old devices no longer supported by the manufacturer	Latest updated devices
Management	Necessity to manage and change configurations yourself	Optimal security policy configuration based on the experience of T-Mobile engineers
Service	Necessity to hire a FW maintenance specialist	Certified, experienced engineers, dedicated technical hotline
Security	Often only a few basic FW rules are even configured	Daily updated signature database
Technology	Owning solutions from little-known, niche manufacturers	Leading world technology: Fortinet

COMPREHENSIVE SERVICES
